Fulvous Whistling-Duck						
						4
03/14/2021	8	Adam McInroy	TX, Hornsby Bend (HOTE 037)	[ph. Adam McInroy] West half of pond 2, in the water equidistant from north and south shores. Rich, warm brown ducks with dark bills, dark backs with brindling, and light lines coming up flanks in wisps. Photos from distance.	30.2182	-97.645
04/30/2021	1	John hale	TX, Moore Farms: Brazos Co.	Large Buffy/rufous whistling duck. Long legged duck standing on edge of flooded cotton field at initial observation later seen feeding in the flooded field. Buffy underparts and face, white flank stripes and dusky neck ring all seen well. Bird observed for ~1 hr	30.4184	-96.247
05/01/2021	1	Keith Andringa	TX, Moore Farms: Brazos Co.	*rare-Photos from Cam-Cont. Bird found yesterday by JH-Orange duck with white butt, bigger than BWTE	30.4182	-96.250
05/09/2021	1	Randolph King	TX, Lake Waco Wetlands (PPW-W 028)	Large, caramel duck, light neck, dark wings, dark blue bill and legs.--Lifer.	31.6074	-97.304
Cinnamon Teal						
						2
03/14/2021	12	Louise Ridlon	TX, Hornsby Bend (HOTE 037)	I was surprised to see so many CITE along with BWTE and GWTE. Birds interspersed all around ponds 1 and 3.	30.2182	-97.645
03/24/2021	14	Michael McCloy	TX, Lake Somerville SP--Flag Pond (Lee Co.)	Tally. Photos	30.3045	-96.696
Eurasian Wigeon						
						6
03/05/2021	1	Fay Ratta	TX, Lake Willow / Waco WTP	[ph. Fay Ratta, Jeremy Ballard, ph. Anand Chaudhary, Keith Reich, Matthew York, m.ob.] Originally spotted by Fay through her scope. Dark rufous, pale gray and buffy forehead with darker head. Texbirds, Fay, "Jeremy Ballard and I spotted a Eurasian Wigeon yesterday at the Waco Waste Water treatment plant. Confirmed by multiple birders who came out to join us. It was on the 2nd sewage pond. If you go on a weekday, just pull up to the gate and it will open. On the weekend, you will need to call the number on the gate. Drive past all the buildings until you can go no further, then turn left to go up on the dikes. Drive slowly on the dikes and try to avoid flushing the ducks there. There's another tank nearby that they go to, but the view won't be as good. It was in amongst the American Wigeons. It has been seen this morning. Matt York has the coordinates in his checklist. < <a href="https://ebird.org/checklist/S82820859">https://ebird.org/checklist/S82820859</a> >. Respect the working environment so we'll be welcome there again."	31.5161	-97.075
03/05/2021	1	Anand Chaudhary	TX, Lake Willow / Waco WTP	Continuing. Reported by Fay and Jeremy. Seen with 4 other birders. Reddish head with a white-yellow band going up from beak. Pictures.	31.5161	-97.075
03/06/2021	1	Edward Wetzel	TX, Lake Willow / Waco WTP	Adult male	31.5161	-97.075
03/07/2021	1	James Sipiora	TX, Lake Willow / Waco WTP	Continuing bird.	31.5161	-97.075
03/08/2021	1	John W. Garbutt	TX, Lake Willow / Waco WTP	Counting bird! Life addition!	31.5161	-97.075
03/09/2021	1	Todd Fitzgerald	TX, Lake Willow / Waco WTP	Continuing bird.	31.5161	-97.075
Long-tailed Duck						
						4
03/11/2021	1	Erik Sauder	TX, Walter E. Long Lake (HOTE-036)	SW corner of lake, associating with buffleheads, ruddy ducks and coots. Female, dark brown and white body with white face surrounded by dark brown. Dark bill.	30.2837	-97.608
03/11/2021	1	Matthew Law	TX, Walter E. Long Lake (HOTE-036)	Continuing, reported this morning by Erik Sauder. Same southwest area of lake, difficult to pick out of so many Bufflehead hens, but slightly larger, stockier female duck, brownish above and white below, white face with large cheek cap, bluish-gray bill. Photo.	30.2837	-97.608

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
03/12/2021	1	Caleb Helsel	TX, Walter E. Long Lake (HOTE-036)	Kevin Ebert spotted it in the western part of the lake. Dark brown female with diamond shaped white eye patch. We enjoyed some binocular/scope views at a distance, but after a while a kayaker flushed it. The bird was seen flying far to the northeast before disappearing around the peninsula. Goodbye :/	30.2837	-97.608
03/14/2021	1	Richard Kaskan	TX, Walter E. Long Lake (HOTE-036)	eBird flagged as rare. With Bufflehead around 30.285130, -97.611002. Photos attached.	30.2837	-97.608
Helmeted Guineafowl						3
03/24/2021	41	Kenneth Bader	TX, North Star Greenbelt, Austin		30.3937	-97.695
04/11/2021	14	Randolph King	TX, China Spring: McLennan Co.		31.6357	-97.323
05/10/2021	8	David Estrada	TX, North Star Greenbelt, Austin	Foraging in south and central-east field areas.	30.3937	-97.695
Chukar						1
03/15/2021	1	Tim Farek	TX, Valley Mills area: McLennan Co.	Grayish brown body with red eyes and orange eye ring. Distinctive black stripe separates light throat from grey head. Black and rust stripes down sides. In road 1/2 mile down from the 1st home on the left. Escaped bird? See photos	31.6305	-97.390
Least Grebe						2
05/23/2021	1	Darrell Vollert	TX, Burton area: Washington Co.	5/24, "Heard calling yesterday while running the Burton Breeding Bird Survey route. Returned today to try to get a visual. Found an opening in the fence line to see the pond from the road. Observed one bird calling on a small pond surrounded by vegetation. Small, dark grebe with yellow irises. Dove often and called quite often. Very familiar with the distinctive call. Got a cell phone video of the grebe calling." Darrell on RBAS, "Yesterday morning I heard a Least Grebe calling at one of the stops on the Burton BBS route in Washington County. This morning I went back to the location at the junction of Sandstone Road and FM to get a visual. I found an opening in the fence row where I could see the pond from the road. The grebe called quite often and dove often. The pond is surrounded by vegetation and appears to be a good nesting site. The species has nested in the county a few times. ... Omitted FM2780 from previous posting.	30.2182	-96.629
05/24/2021	1	Darrell Vollert	TX, Burton area: Washington Co.	Heard calling yesterday while running the Burton Breeding Bird Survey route. Returned today to try to get a visual. Found an opening in the fence line to see the pond from the road. Observed one bird calling on a small pond surrounded by vegetation. Small, dark grebe with yellow irises. Dove often and called quite often. Very familiar with the distinctive call. Got a cell phone video of the grebe calling.	30.2182	-96.629
Western Grebe						22
03/10/2021	1	Janet Davis	TX, Walter E. Long Lake (HOTE-036)	Huge surprise swimming near the dam face with Eared Grebes, American Coots, Ruddy Ducks, and Northern Shovelers. Large grebe with long thin greenish yellow bill, red eyes, strikingly long slender neck, black cap extending below eye (unlike Clark's Grebe); black extending all the way down the back of the neck; white coloration extending from lower mandible down front of neck, chest, and belly, which was visible when bird preened. Brownish gray wings and back. At least twice as large as nearby Eareds. Floating with head tucked a majority of the time. Great views with scope and binoculars. Photo to follow.	30.2837	-97.608
03/11/2021	1	Tyler Miloy	TX, Walter E. Long Lake (HOTE-036)	Large thin grebe with straight dull yellow bill. Sharply contrasting black and white plumage, with black extending well below eye. Near shore by dam	30.2837	-97.608
03/12/2021	1	Jane Tillman	TX, Walter E. Long Lake (HOTE-036)	Continuing by dam.	30.2837	-97.608

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
03/13/2021	1	Jeff Hall	TX, Walter E. Long Lake (HOTE-036)	near the dam just beyond the reeds	30.2837	-97.608
03/14/2021	1	Richard Kaskan	TX, Walter E. Long Lake (HOTE-036)	eBird flagged as rare. Continuing bird, near reeds by dam. Photos attached.	30.2837	-97.608
03/15/2021	1	Lauren Wojcik	TX, Walter E. Long Lake (HOTE-036)	Continuing bird at this location. Swimming near the dam, in group of ruddy ducks.	30.2837	-97.608
03/16/2021	1	Janet Davis	TX, Walter E. Long Lake (HOTE-036)	Continuing near the dam among Ruddies, Bufflehead, and Coots. Photo to follow.	30.2837	-97.608
03/17/2021	1	Skip Mencio	TX, Walter E. Long Lake (HOTE-036)	Single bird near dam. Black surrounds a red eye. Continuing bird.	30.2837	-97.608
03/18/2021	1	Derrick Mims	TX, Walter E. Long Lake (HOTE-036)	Continuing bird. Much larger bird when compared to the other grebe species found on the lake. Was observed moving along the shoreline from the dam all the way to the open area near the boat ramp.	30.2837	-97.608
03/20/2021	1	Joellen Peters	TX, Walter E. Long Lake (HOTE-036)	Continuing bird. On south side by dam	30.2837	-97.608
03/21/2021	1	Steven Self	TX, Walter E. Long Lake (HOTE-036)	I saw this bird near the dam end of Walter E. Long Lake, swimming among a group of American Coots. It had red eyes and a long pale yellow beak. Including photos.	30.2837	-97.608
03/23/2021	1	beau schaefer	TX, Hornsby Bend (HOTE 037)	Continuing at Walter long; large black and white grebe with long drab yellow-green bill slightly upturned, black cap below the eye to rule out Clark's	30.2182	-97.645
03/25/2021	1	Chuck Sexton	TX, Walter E. Long Lake (HOTE-036)	Continuing bird, foraging in far SE corner of lake, typically within 50 yards of the dam.	30.2837	-97.608
03/27/2021	1	Austin Jones	TX, Walter E. Long Lake (HOTE-036)	Seen near the jetty on south end of the lake	30.2837	-97.608
03/28/2021	1	Jeremy Webster	TX, Walter E. Long Lake (HOTE-036)	Continuing large black/white grebe. Grayish flanks, black through eye, yellow-tinged bill. Seen north of the dam frequently diving. County bird 300!	30.2837	-97.608
03/29/2021	1	Tyler Miloy	TX, Walter E. Long Lake (HOTE-036)	Continuing near dam	30.2837	-97.608
03/30/2021	1	Hank George	TX, Walter E. Long Lake (HOTE-036)	continuing seen swimming next to dam, large grebe with white and black neck and red eyes	30.2837	-97.608
04/04/2021	1	Janet Davis	TX, Walter E. Long Lake (HOTE-036)	Remarkably continuing along the dam face. Photo to follow.	30.2837	-97.608
04/04/2021	2	Rich Kostecke	TX, Granger Lake--Friendship Park	Poor (no, really pretty horrible) distant photos. Large grebes, black on top, white on bottom, yellow-green bill (appeared dull colored, not bright), extensive black on face rear seemed to drop below eye. Stayed in middle of lake, make even scope views difficult. In photo, 3 American Coots to left, Bufflehead to right.	30.7190	-97.340
04/04/2021	2	Rich Kostecke	TX, Granger Lake Dam area & Overlook	Still too distant for good looks from dam, horrible, horrible distant photo! Large grebe, black on top, white on bottom, yellow-green bill (appeared dull colored, not bright), extensive black on face rear seemed to drop below eye.	30.6856	-97.338
04/05/2021	1	Brush Freeman	TX, Granger Lake Area (HOTE 031)	Maybe two (two birds together) very far out on lake and scope absolutely required	30.7002	-97.359
04/11/2021	1	Richard Deulofeut	TX, Walter E. Long Lake (HOTE-036)	Surprised to still see this continuing bird near dam so deep into the spring. Lifer for Mark!	30.2837	-97.608
Groove-billed Ani						1
05/06/2021	1	Richard Kaskan	TX, Berry Springs Park, Georgetown	eBird flagged as rare. Byron Stone found this bird in the grass behind the dumpster at the end of the upper parking lot. Eventually I saw it briefly on the mowed grass, then it moved up into the small tree most uphill from the dumpster, where I photographed it. Kelly Holligan stopped by and got on the bird, then some dogs spooked it and it flew off towards the general vicinity of the restrooms. I had to leave, and did not see it again. I will attach photos.	30.6820	-97.641
Black-billed Cuckoo						1
05/10/2021	1	Laura Sare	TX, Texas A&M Univ.--Research Park	Saw flying - no rufous in wings	30.6029	-96.360
Common Nighthawk						2
05/19/2021	28	Brandy Falise	TX, Bee Creek Park / Anderson Arboretum (PPW-W 009)	Circling above Bee creek park and cemetery. Calling while circling. Photos to follow	30.6019	-96.306
05/20/2021	60	Sean Mecredy	TX, Granger Lake Area (HOTE 031)	one group of 45 midday, others roosting singly	30.7002	-97.359

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
Chuck-will's-widow						
04/30/2021	22	Charlie Plimpton	TX, Fort Hood East Range--South (Restricted Access)	Heard at multiple points along a survey route.	31.1562	-97.661
05/28/2021	28	Charlie Plimpton	TX, Fort Hood East Range--South (Restricted Access)	Heard at multiple points while conducting nocturnal bird surveys.	31.1562	-97.661
Chimney Swift						
04/20/2021	329	Laurie Miraglia	TX, Austin (Travis Co.)	Roost. Swifts began flying around chimney at 8:11 p.m. First swift entered chimney at 8:16, most between 8:19-8:21 and several then straggled into chimney until 8:36 p.m.	30.2508	-97.759
04/27/2021	397	Laurie Miraglia	TX, Austin (Travis Co.)	Roost. 1st swift entered chimney at 7:53, with a rush of about 60 entering at 8:00 p.m. The swifts then arrived in small waves for another 30 minutes. Last swift entered chimney at 8:38.	30.2508	-97.759
Virginia Rail						
03/13/2021	2	Jay Packer	TX, Marlin City Lakes	[rec. Jay Parker, Amy Parker] The first Virginia Rail responded to playback closer to the road from the marsh. The second responded to Sora playback closer to the lake spillway. Grunt calls, like a car engine trying to start. Attempted to get recordings. Car drove by in the first recording and the bird was giving short barks/grunts in the second recording. Upon examining the recordings, the wind is very high, causing abysmal audio quality. Please open the sound files in the Macaulay Library to see the notes associated with the audio, which include details about exactly how many seconds in to the clip the bird can be heard. In the first clip (ML317264891), the bird sounded very much like the recording in ML247898861 found here: <a href="https://macaulaylibrary.org/asset/247898861">https://macaulaylibrary.org/asset/247898861</a>	31.3460	-96.863
03/18/2021	1	Dina Perry	TX, Marlin City Lakes	[Dina Perry] South end of new city lake in reedy area at spillway. Responded when taped grunt call was played.	31.3460	-96.863
Purple Gallinule						
04/06/2021	1	Carrie Roszell	TX, Southeast Greenway, Mueller	Have a photo	30.2905	-97.693
04/07/2021	1	Richard Deulofeut	TX, Southeast Greenway, Mueller	WOW!!!! Continuing adult bird first reported by Carrie Roszell. Seen on south edge of pond, across from culvert, then moved east along the lower trail by the water. Beautiful coot-sized bird, purplish-blue fronted, teal sided. Has fully developed red bill with yellow tip and pale blue shield on forehead. Yellow legs with long toes. Delighted to see this vibrant lifer.	30.2905	-97.693
04/08/2021	1	Jack Lehman	TX, Southeast Greenway, Mueller	continuing bird	30.2905	-97.693
04/09/2021	1	Nancy Gentzel	TX, Mueller Southeast Greenway-Tilley str. / Manor rd. ponds	In southeast pond of Mueller Park	30.2907	-97.690
04/09/2021	1	Don Brode	TX, Southeast Greenway, Mueller	Unmistakable iridescent with red/yellow bill feeding in golf course side bank in reeds. Obscured photos coming. Fun bird!	30.2905	-97.693
04/10/2021	1	Raquel Estevez	TX, Southeast Greenway, Mueller	Purple neck and greenish blue wings. Powder blue spot at top of bill, then red.-Seen on matt of vegetation near storm drain	30.2905	-97.693
04/11/2021	1	Virginia Hoffman	TX, Southeast Greenway, Mueller	Continuing bird near south shore. (Not a great shot, but enough to see it was there before it scooted back into the plants).	30.2905	-97.693
04/12/2021	1	Justin Bosler	TX, Southeast Greenway, Mueller	continuing ad., skulking thru aquatic veg on SW shore of wetland, photos	30.2905	-97.693
04/13/2021	1	Adam McInroy	TX, Southeast Greenway, Mueller	Continuing. South bank this morning, a little east of previous locations.	30.2905	-97.693
04/13/2021	1	Hannah Mindeman S	TX, Southeast Greenway, Mueller	Continuing bird	30.2905	-97.693
04/15/2021	1	Virginia Hoffman	TX, Southeast Greenway, Mueller	Continuing bird. Remained visible for about 1 minute until American Coot approached it. Photo to follow.	30.2905	-97.693
04/16/2021	1	MaryG Zell	TX, Southeast Greenway, Mueller	Walking through reeds at the north central part of the pond. Continuing bird.	30.2905	-97.693
04/17/2021	1	Barb lindenmuth	TX, Southeast Greenway, Mueller	Continuing adult! Foraging in Central Park of W section of the ponds. Photos.	30.2905	-97.693

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
04/18/2021	1	Amy Reynolds	TX, Southeast Greenway, Mueller	Continuing bird. seen in middle of green plants just east of the flood sign. Have pictures	30.2905	-97.693
04/19/2021	1	Paul Sunby	TX, Southeast Greenway, Mueller	Purple-bodied coot-like bird with long yellow legs, bluish wings, pale blue forehead, red bill. Was being mercilessly harassed by Great-tailed Grackles which mostly kept it pinned to heavy cover.	30.2905	-97.693
04/20/2021	1	Kelly Coles	TX, Southeast Greenway, Mueller	Ongoing bird	30.2905	-97.693
04/21/2021	1	Alex Lamoreaux	TX, Southeast Greenway, Mueller	Continuing in SW portion near turtle basking spot. Attacked a female GTGR. Photos.	30.2905	-97.693
04/22/2021	1	Isaac Sanchez	TX, Southeast Greenway, Mueller	Bird flushed several times by Coots and/or Grackles. Found midway between west end of the pond and bridge.	30.2905	-97.693
04/24/2021	1	Cheryl McGrath	TX, Southeast Greenway, Mueller	Continuing bird. Greenish purple gallinule with red shield	30.2905	-97.693
04/25/2021	1	Virginia Hoffman	TX, Southeast Greenway, Mueller	Continuing Bird, irredesent purple-black-teal upper, yellow/orange legs, orange and red beak, similar in shape and size to American Coot. Location: in island of vegetation near south shore, located in western 1/3 of pond (from Tilley St end). The Gallinule seems to hide from people on the lower foot trail, best to stand way above and wait for it to peak out. Watched it today for 5 to 10 minutes. Photo to follow.	30.2905	-97.693
04/26/2021	1	Tammy Brown	TX, Southeast Greenway, Mueller	In the middle of the first pond, purple with red and yellow bill.	30.2905	-97.693
04/27/2021	1	MaryG Zell	TX, Southeast Greenway, Mueller	Recurring bird. Seen in the reeds in the south central part of the pond.	30.2905	-97.693
04/30/2021	1	Wendy Harte	TX, Southeast Greenway, Mueller	Bluish purple neck, black and green back, dark belly orange and whitish yellow bill. Continues here.	30.2905	-97.693
05/02/2021	1	Arthur Mercado	TX, Southeast Greenway, Mueller	Continuing. On south shore, near beaver dam. Photo.	30.2905	-97.693
05/08/2021	1	Shelia Hargis	TX, Southeast Greenway, Mueller	I finally saw this continuing bird! Bluish/purplish/greenish rail with brownish back, red bill with yellow bill tip and light blue shield on head.	30.2905	-97.693
05/14/2021	1	Vander Stoetz	TX, Southeast Greenway, Mueller	Pics to follow	30.2905	-97.693
05/30/2021	4	Ryan Shaw	TX, Carlos Lake	All seen in one field of view feeding on top of lily pads.	30.6045	-96.081
Black-bellied Plover						2
03/19/2021	10	Danny Pickens	TX, Richland Creek WMA (N. Unit)(Freestone Co.)	Photos available.	31.9833	-96.081
05/04/2021	14	Simon Kiacz	TX, Brazos Co.-- Sims Lane/Sims Lane Cutoff	*rare--1 cont. Solo bird and a flock of 13 almost full breeding plumage.	30.6749	-96.517
American Golden-Plover						21
03/03/2021	1	Tom Huston	TX, Hornsby Bend (HOTE 037)	SE corner of West Pond 1	30.2182	-97.645
03/05/2021	5	Jane Tillman	TX, Hornsby Bend (HOTE 037)	Medium sized shorebirds flew in to north end of 1w, briefly landed then took off. After a few minutes they returned but did not land. There was too much human activity for them perhaps. When they flew in we noticed no white in tail, ruling out BBPL. Brown/gray back sort of mottled which gave a rich color, round plover head, small bill, very distinct supercilium which supports AGPL. Good if brief scope view.. Terrible photo. It's blurred, showing birds in flight. Long-winged, angular shape to wings.	30.2182	-97.645
03/29/2021	26	Rich Kostecke	TX, Williamson Co.-- CR352 (megafield S. of Alligator Rd) area	Counted individuals in flock	30.7531	-97.382
03/29/2021	31	Rich Kostecke	TX, Granger area: Williamson Co.	Counted individuals	30.7308	-97.362
04/03/2021	29	Arman Moreno	TX, Granger area: Williamson Co.	Careful 1X1 count in flooded field	30.7258	-97.369
04/04/2021	85	Jason Leifester	TX, Thrall area: Williamson Co.	Exact count, but probably far more were out there. They were in the heavily grazed pastures with very short grass all along CR 435 for about the first 2.5 miles south of 79.	30.5415	-97.229
04/05/2021	68	Gary Yoder	TX, Shipp / Stagners Lake	Probably undercounted	29.9886	-97.120
04/05/2021	250	Gary Yoder	TX, Fayette Co.-- Seydler rd sand/gravel ponds	Rough count given truck traffic. Certainly hundreds.	29.8113	-96.785

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
04/05/2021	314	Simon Kiacz	TX, Brazos Co.-- Sims Lane/Sims Lane Cutoff	*high* 1x1 count. Likely missed many; spread evenly throughout the entire sod farm	30.6749	-96.517
04/09/2021	300	Tyler Scott	TX, Brazos Co.-- Sims Lane/Sims Lane Cutoff	Roughly 200 in one field. Easily 100 more scattered.	30.6749	-96.517
04/11/2021	13	nicole land	TX, Corsicana area: Navarro Co.	On a cow pasture next to my house. Near the wetlands. Will add photos	32.0042	-96.152
04/11/2021	40	Galen Stewart	TX, Thrall area: Williamson Co.	Two large ouggs, one on CR436 and other on CR435 feeding in pastures	30.5724	-97.225
04/11/2021	100	Meredith Anderson	TX, Brazos Co.-- Sims Lane/Sims Lane Cutoff	Continuing. Large number, this is low estimate. Greyish belly and cap w/ contrasting white supercilium	30.6749	-96.517
04/16/2021	850	Simon Kiacz	TX, Brazos Co.-- Sims Lane/Sims Lane Cutoff	*high Estimate; many separate flocks of 50-100 in addition to a large flock of a few hundred in the western most section	30.6749	-96.517
04/17/2021	200	Vaishali Katju	TX, Brazos Co.-- Sims Lane/Sims Lane Cutoff	Minimum estimate. Widely distributed on sod fields on both sides of road.	30.6749	-96.517
04/24/2021	137	Vaishali Katju	TX, Brazos Co.-- Sims Lane/Sims Lane Cutoff	Tallied in consecutive, nonoverlapping photographs. More likely to be an underestimate.	30.6749	-96.517
05/01/2021	10	Caleb Helsel	TX, Hornsby Bend (HOTE 037)	Flagged as a high count. Saw a flock of exactly ten pluvialis plovers flying over the trail near platt lane	30.2182	-97.645
05/01/2021	12	Simon Kiacz	TX, Allen Farm/Millican area (FM159)	*high-Actual count of a solo and flock of 11	30.3975	-96.240
05/04/2021	1	Cindy & Gene Cunni	TX, Hornsby Bend (HOTE 037)	Checked back, dark face with white arc from eyebrow to cheek. Distinguished from American golden plover by white visible below tail. See photos	30.2182	-97.645
05/05/2021	24	Micky Eubanks	TX, Brazos Co.-- Sims Lane/Sims Lane Cutoff	Estimated	30.6749	-96.517
05/19/2021	17	Simon Kiacz	TX, Brazos Co.-- Sims Lane/Sims Lane Cutoff	*high-1x1 count	30.6749	-96.517
Semipalmated Plover						1
05/27/2021	25	Meredith Anderson	TX, Brazos Co.-- Sims Lane/Sims Lane Cutoff	Scattered among wrsa feeding. Smaller size, rufousy on top with black legs w/ head and neck streaking.	30.6749	-96.517
Piping Plover						9
04/10/2021	1	Caleb Helsel	TX, Hornsby Bend (HOTE 037)	Continuing on pond 1 W. Will upload some distant photos	30.2182	-97.645
04/15/2021	2	Jane Tillman	TX, Lake Travis-- Bob Wentz Windy Point Pk	Banded pale small plovers with orangey bills with black tips and orangey legs. No dark patch behind eyes as in snowy. It was more whitish there. Clean white above bill with narrow black band across forehead. Interesting that narrow black band on breast was not broken. On island. At first hard to see as out on narrow spit, but they got very close to the channel between the island and point. Photos to be added. Edit: (In the photo with the Semipalmated Plover you can see this is a different piping-some bands are white.)	30.4128	-97.900
04/16/2021	1	Daniel Kelch	TX, Belton Lake-- Temple Lake Park	adult with leg bands. Photographed	31.1332	-97.497
04/17/2021	1	Jeff Hall	TX, Belton Lake-- Temple Lake Park	In the shoreline at the west side. continuing bird.	31.1332	-97.497
04/17/2021	1	Jane Tillman	TX, Lake Travis-- Bob Wentz Windy Point Pk	Refound by Vincent. Small dry sand color plover with narrow complete breastband. May be one from a couple days ago as color bands look similar. Hope to verify with photos.	30.4128	-97.900
04/17/2021	1	Steve Snyder	TX, Temple Lions Park	Previously reported on 4-16.	31.1328	-97.497
04/18/2021	1	Andy & Ellen Filtnes	TX, Lake Travis-- Bob Wentz Windy Point Pk	Continuing. Relocated by Vincent Oâ€™Brien this morning.	30.4128	-97.900
04/18/2021	1	Scott Snyder	TX, Belton Lake-- Temple Lake Park	Photo added.	31.1332	-97.497
04/19/2021	2	MaryG Zell	TX, Hornsby Bend (HOTE 037)	In NE corner of pond 1W	30.2182	-97.645

Least Tern						9
04/18/2021	1	Greg Cook	TX, Lake Somerville SP (Lee Co.) (Nails Crk & Flag Pond)	Small white tern, with white forehead	30.2950	-96.664
05/01/2021	1	Bruce Neville	TX, Lake Bryan (PPW-W 012)	a very small tern. mostly white face and underparts. light gray upperparts. all dark crown connected to a black line going through eye. to the yellow bill. will add photo later.	30.7063	-96.464
05/01/2021	1	Jane Tillman	TX, Lake Travis-- Bob Wentz Windy Point Pk	Dainty tern with white forehead and yellow bill	30.4128	-97.900
05/04/2021	1	Jane Tillman	TX, Lake Travis-- Bob Wentz Windy Point Pk	Small tern fishing when I arrived and hunkered down on east tip of island with the avocets. Bright white forehead, yellow bill with tiny bit of black at end. Black wing tips. Photo to be added.	30.4128	-97.900

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
05/04/2021	1	Janet Davis	TX, Lake Travis-- Bob Wentz Windy Point Pk	Continuing bird first seen by Jane Tillman after Saturday's storm. Small tern with white forehead, black cap and yellow bill. White breast and belly, Gray back and wings. Black wing tips. Mostly resting on sandy spit at island encircled by Sanderlings and Baird's Sandpipers. Occasionally took flight for several minutes at a time. Fast wing beats in the stiff wind. Distant photos taken.	30.4128	-97.900
05/12/2021	2	Manuel Salgado	TX, Brazos Co.-- Sims Lane/Sims Lane Cutoff	Small tern with black head and white spot near yellow bill with black spots at front. Have pictures.	30.6749	-96.517
05/12/2021	1	Jane Tillman	TX, Lake Travis-- Bob Wentz Windy Point Pk	Yet another Least Tern! Flying with the Black Terns but could not relocate. Good binocular view of White forehead on smaller tern with yellow bill, too distant to see black tip. Line of Black on leading edge of wing. Gray back.	30.4128	-97.900
05/18/2021	2	Janet Davis	TX, Lake Travis-- Bob Wentz Windy Point Pk	Spotted earlier by Jane and Andy. Flying, diving, and resting on the shoreline among Franklin's Gulls and Black-bellied Plover. Petite terns with yellow bills and white foreheads. Black cap.	30.4128	-97.900
05/19/2021	6	Richard Kaskan	TX, Granger Lake Area (HOTE 031)	eBird flagged as rare. Tim Fennell alerted me about the presence of these birds on the reservoir, and I caught up with them at Willis Creek Park. 5 adults and a bird that I wondered about for a while, but I'm reasonably sure it is a subadult. I will attach a poor photo - they were pretty distant, but I got good scope looks. Small yellow-billed terns with white foreheads. The non-adult had a black bill and dark carpal bar; some black on the head but more white than the others. In the photo are 5 of the six - the non-adult is the leftmost bird.	30.7002	-97.359
Caspian Tern 04/30/2021	1	Bruce Neville	TX, Madison Co.-- Virginia Lane Lake	a large tern standing in shallow water by a very low island. Considerably larger than nearby FOTE. Black crown with a few white spots in the forehead. Otherwise light gray upperparts and all white face and underparts. black on the primaries seen only infrequently as bird was positioned looking directly at us, occasionally turning its head so we could see its profile. Oh yes, and a big honking bright red bill	31.0341	-95.686
Common Tern 05/19/2021	3	Andy & Ellen Filtnes	TX, Lake Travis-- Bob Wentz Windy Point Pk	Photos. Grey under parts. Tail shorter than wings. Darker bill. Flight photo shows white tail vs gray in Forster's	30.4128	-97.900
Common Loon 04/03/2021	2	Arman Moreno	TX, Granger Lake-- Wilson H. Fox Park	In alternate, floating way out	30.6820	-97.353
04/03/2021	3	Jay Packer	TX, Gibbons Creek Reservoir	All birds swimming together. Distinctive flat headed shape. Dark above, white below.	30.6095	-96.065
04/04/2021	2	Rich Kostecke	TX, Granger Lake Dam area & Overlook	Continuing. Photo.	30.6856	-97.338
05/02/2021	1	Vincent O'Brien	TX, Lake Travis-- Bob Wentz Windy Point Pk	Distant loon spotted by Jeff. Nonbreeding-like bird with distinct well contrasting jagged dark border to pale long thick neck. Common-like pale neck collar seemed to rule out other species. Distant views with 20-80 scope. May have useable photos to upload shortly.	30.4128	-97.900
05/03/2021	1	Fred Collins	TX, Camp Creek Lake (restricted access)	Breeding plumage. Too distant for photo. Watched and tried to digiscope for several minutes. Flapped its wings a couple of times. Wings all dark above. Bill long and pointed, appeared dark at the distance. Typical loon profile. Photographed	31.0580	-96.304
05/11/2021	2	Gil Eckrich	TX, Belton Lake-- Temple Lake Park	Initially seen together, later separated. One called several times. Photos	31.1332	-97.497
05/14/2021	2	Andy & Ellen Filtnes	TX, Lake Travis-- Bob Wentz Windy Point Pk		30.4128	-97.900
05/14/2021	1	Doug Orama	TX, Belton Lake-- Temple Lake Park	I have been looking for loons unsuccessfully thus far until this morning when I heard a call from out on the water. Unmistakable loon call. I turned and looked toward it just in time to see it submerge.	31.1332	-97.497
05/17/2021	1	Andy & Ellen Filtnes	TX, Lake Travis-- Bob Wentz Windy Point Pk	Continuing -photo	30.4128	-97.900

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
05/17/2021	1	Doug Orama	TX, Belton Lake-- Temple Lake Park	Seen swimming fairly close to shore for a good period of time before it dove and disappeared. Photographed.	31.1332	-97.497
05/18/2021	1	Janet Davis	TX, Lake Travis-- Bob Wentz Windy Point Pk	Possibly two birds. Spotted the first swimming not far from the Whimbrel resting on the island. Later saw another loon swimming on the opposite side of the lake to the northwest, but could not relocate the first in the spot where it had been floating.	30.4128	-97.900
05/19/2021	2	Andy & Ellen Filtnes	TX, Lake Travis-- Bob Wentz Windy Point Pk	See at some distance west of the point. Overall pale appearance. Likely the same two birds seen recently. Spotted by Justin Bosler and Aldo observed by Jane Tillman & Lance Felber.	30.4128	-97.900
05/20/2021	2	Andy & Ellen Filtnes	TX, Lake Travis-- Bob Wentz Windy Point Pk	Continuing. Seen at distance to west of point and also close to the island. Photo	30.4128	-97.900
05/22/2021	1	Andy & Ellen Filtnes	TX, Lake Travis-- Bob Wentz Windy Point Pk	Continuing. Seen near eastern edge of island.	30.4128	-97.900
05/23/2021	2	Vincent O'Brien	TX, Lake Travis-- Bob Wentz Windy Point Pk	Continuing bird. Pair of loons seen near the sandbar. Block-headed looking loons with broken border to neck, large bills. Good views of both birds, but could only get photo of one. Seen with Jane, Adam, and Terry.	30.4128	-97.900
05/24/2021	2	Justin Bosler	TX, Lake Travis-- Bob Wentz Windy Point Pk	continuing 2 in basic plumage, actively diving together way out to NE behind northernmost island	30.4128	-97.900
Glossy Ibis 05/05/2021	1	Micky Eubanks	TX, Brazos Co.-- Sims Lane/Sims Lane Cutoff	Glossy x White-faced Ibis (hybrid)	30.6749	-96.517
Harris's Hawk 03/10/2021	1	MaryG Zell	TX, Round Rock: Williamson Co.	On power line along a busy road	30.4961	-97.652
White-tailed Hawk 04/24/2021	1	Sandy Dillard	TX, Brazos Co.-- Sims Lane/Sims Lane Cutoff	Juvenile molding into adult that's what it look like definitely had a white tail long wings the rustiest patches starting to come in	30.6749	-96.517
05/15/2021	1	Richard Harman	TX, Bastrop County	Adult in classic plumage of grey, white and reddish brown seen perched and then in flight close to the road. Very clear view of very typical grey "hood". Has been reported on this stretch previously.	30.3812	-97.369
Broad-winged Hawk 04/06/2021	3,297	Simon Kiacz	TX, Bryan: Brazos Co.	Estimate. 2x2 count except large kettles which got 10x10 counts	30.6727	-96.322
Swainson's Hawk 04/29/2021	1		TX, Allen Farm/Millican area (FM159)	[ph. Cathy Stark, RBAS Facebook] I'd help please? He was perched on FM 159 Bert, "I concur with the others in that this is a juvenile Swainson's Hawk. The field marks I noted that fit juvenile Swainson's are: malar mark from forward of eye to dark patch on side of breast, thin dark eyeline, dark bill with yellow cere, white throat, vague white "V" on back, whitish head, wingtips lightly shorter than tail tip, brown tail has numerous thin black bands, spotted black white undertail covets contrast with darker secondaries and primaries, leg feathers not barred, lacks dark patagial mark."	30.3995	-96.241
Burrowing Owl 03/18/2021	1	Robert Tizard	TX, O D Butler Animal Science Complex	[ph. Robert Tizard]	30.5550	-96.414
Red-naped Sapsucker 03/14/2021	1	Janet Davis	TX, Commons Ford Ranch Metro Park	A very nice surprise. Namesake red nape. Bright red throat with clear demarcation. Seen in creekside pecan near hillside restroom. We saw the bird again on the other side of the creek and were lucky to spend a lot of time observing this beauty. Photo to follow.	30.3374	-97.893

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
Crested Caracara 03/22/2021	2		TX, College Station: Brazos Co.	[FaceBook RBAS] Vaishali Katju, "I am happy to report that a Crested Caracara pair has got established right behind our property. I see them daily now and they are very active patrolling the forest."	0.0000	0.0000
American Kestrel 05/14/2021	2	Ken English	TX, Brenham: Washington Co.	These are occasional visitors around our property. No residents I am aware of.	30.2837	-96.518
05/19/2021	2	linda hale	TX, Carter Lake, College Station	Observed two adult birds on the wire next to the utility pole they nested in last year. Observed male catch prey, either eat or tear it, maybe both, then fly to the presumed nest in the hollow arm with food then it left without the food. I was not close enough to hear the young as I did last year, but will try later for sound recordings.	30.5838	-96.255
05/20/2021	2	linda hale	TX, Carter Lake, College Station	Continuing birds that I have been observing. I saw adult male and female on the wire of a utility pole. I saw the female adult carry food into one of the hollow arms of the utility pole, the same one they nested in last year. Also observed droppings running down the side of the pole.	30.5838	-96.255
05/25/2021	2	linda hale	TX, Carter Lake, College Station	Went by to check on the kestrels nesting on Bradley Road. I was finally able to hear the young up in the nest arm. I got a recording. It is faint, but best I could do. I observed the male eating a rodent on top of a railroad tie fence corner post, so I had an idea of the rodent's size. It is the largest prey I have seen one of the kestrels take yet. Comparing it to the post, I'd say it was larger than a large deer mouse. He ate on it for a very long time. The female flew in, but I didn't see him share. Then he flew up to the wire near the nest pole. I was hoping he would fly in and feed the babies, but he and the female were not happy with my presence. I did not want to harass them, so I backed up, but they still wouldn't relax and	30.5838	-96.255
Monk Parakeet 04/14/2021	3	Bernd Gravenstein	TX, Bastrop County	Flyover. Green and gray, long tail, gave distinctive squawking call.	30.1222	-97.371
Brown-crested Flycatcher 04/29/2021	1	Richard Harman	TX, Harman Ranch (private)	Irregular yet annual visitor here. Distinctive call heard.	30.2175	-97.415
05/08/2021	1	Brush Freeman	TX, Peggy Garner Park	diagonstic whit callss and chatters, most HO but seen as it flew from one tree to another in private yards. Not GCFL for sure. overall duller . I recorded it and will post later and to Inaturalist. I believe this is a county bird for me, at least I don't show entering one to ebird before..	30.5395	-97.838
05/09/2021	1	Brush Freeman	TX, Peggy Garner Park	HO continuing from yesterday in neighborhood next to park. Only heard "whit" calls...Be aware a GCFL is also in this area.	30.5395	-97.838
05/15/2021	1	Brush Freeman	TX, Peggy Garner Park	[Brush Freeman, at his home near Peggy Garner Park] "Continuing. Heard only from down the street from us...Distinct whit calls and some chattering"	30.5395	-97.838
Couch's Kingbird 04/24/2021	2	Daniel Kelch	TX, Belton	I saw four Kingbirds in a parking lot, and decided to take a better look. Two of the birds sounded like Couch's Kingbirds, so I played a call to see if they would react. When I played the call they vocalized back. They also flew straight to my truck and one time kind of hovered around it. The two Western Kingbirds did not react to the call I played. Their behavior appeared to be that of defending territory or nest sight. I think this might be a mated pair based on behavior. The two COKI stayed together most of the time. I also took photos of what I think could be courting behavior.	31.0772	-97.457
04/25/2021	2	Randy Pinkston	TX, Belton	active nest-building by adult pair. photos coming. definite Couch's vocalizations confirmed.	31.0768	-97.458
04/28/2021	1	Charlie Plimpton	TX, Belton	Briefly seen after it popped out of a Live Oak tree and onto the telephone wires. I looked away for a moment and it disappeared. Most likely coming off and on the nest. Did not see a second bird.	31.0768	-97.458

Blue-gray Gnatcatcher						
03/25/2021	18	Cameron Johnson	TX, Texas A&M Univ.--Ecology & Natural Resource area	Conservative estimate. One tree alone had at least 12. Another tree had at least 5. Another was found alone.	30.5734	-96.365

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
03/25/2021	18	Dianne Robinson	TX, Texas A&M Univ.--Ecology & Natural Resource area	Multiple mixed flocks with chickadees, warblers across property	30.5734	-96.365
03/29/2021	23	Byron Stone	TX, Fort Parker SP (PPW-W024)	Pairs and trios everywhere	31.5943	-96.530
04/01/2021	16	Cameron Johnson	TX, Texas A&M Univ.--Ecology & Natural Resource area	Conservative count. Two large groups and several smaller ones.	30.5734	-96.365
Western Bluebird						3
03/12/2021	5	Tim Farek	TX, Valley Mills area: McLennan Co.	[ph. Tim Farek] 3 males 2 females In trees and on fence lines. Near Hwy 6 north side Wolf road. Completely blue head. Red on back.	31.6228	-97.413
03/13/2021	7	Matthew York	TX, Valley Mills area: McLennan Co.	Continuing birds reported by Tim Farek. Excellent, we were feeling left out of the Western Bluebird phenomenon this winter. Males blue throat and head, red breast with fairly extensive chestnut on the back. Female a bit of a grayscale version with grayish head and throat with dusky faded light red breast, some very light faded hint of pale reddish on back, blue wings. 31.62337 -97.41360, and foraging northward along road'a fenceline and fenceline hackberry trees, at times further distance into the private property on west side of the road. photos.	31.5926	-97.385
03/15/2021	5	Nicholas DeMaio	TX, Valley Mills area: McLennan Co.	Seen about 1:03pm. Property at 3405 Wolf Ln. The birds were perching on the fence and foraging on the ground on the east side of the road. It's the property with the rust/maroon colored cattle gate. Good views of the males in good light. Blue on throat, blue on lower belly. Thanks to everyone who posted notes.	31.6233	-97.413
Mountain Bluebird						4
03/05/2021	1	Anand Chaudhary	TX, McLennan Co.-- Old Crawford rd.	Continuing, known location. Female/immature. Dull gray, darker back and wings. Tinge of blue seen in flight. Pictures.	31.5847	-97.339
03/06/2021	16	Anand Chaudhary	TX, McLennan County	At location where Sage Thrasher was reported from. Observed for >15 minutes. At least two bright blue adult males.	31.6333	-97.391
03/13/2021	13	Anand Chaudhary	TX, McLennan County	Continuing. Bright blue male and rest were gray with shiny blue mixed on wing and tails.	31.6333	-97.391
03/15/2021	5	Tim Farek	TX, Valley Mills area: McLennan Co.	Continuing birds. All females. Brown and gray bird with bright blue wings. Blue on tails and rear. Thin bills. Did not see a male. See photos	31.6305	-97.390
Veery						2
04/24/2021	1	Meredith Anderson	TX, Texas A&M Univ.--Ecology & Natural Resource area	Heard only, but clearly. Two stage descending call, nasal, almost mechanical quality. Singing in chorus with swainsonâ€™s thrush& yellow rumped first thing in the morning near white creek ravine. Heard by two people that work/have worked with birds in areas of eastern us where veerys sing incessantly	30.5734	-96.365
04/26/2021	1	Matthew Louder	TX, Texas A&M University main campus	Rufous back and face. Pale spots limited to upper chest; no eye ring. Poor phone pics attached. Observed clearly from < 10 ft	30.6155	-96.341
Long-billed Thrasher						6
03/27/2021	1	Nick A. Komar Jr.	TX, Onion Creek Metropolitan Park	[Nick Komar Jr.] Singing. Along cactus trail north of creek. All black bill with grey cheek. Justin Bosler, "On Saturday, 27 March, Nick Komar Jr. found a territorial Long-billed Thrasher along the Onion Creek Greenbelt. The bird continues this afternoon/evening in the same area and is vigorously singing. There are very few legit records for the county and probably equally as many mis-identified Brown Thrashers over the years. Come on out and get a verified one! Coordinates of it's favored singing perch here: 30.1671016, -97.7482072	30.1618	-97.756
03/30/2021	1	Justin Bosler	TX, Onion Creek Metropolitan Park	continuing ad. m, vigorously singing on territory, along greenbelt trail at: 30.1671016, -97.7482072, audio recordings tba	30.1618	-97.756

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
03/31/2021	1	Carlos Ross	TX, Onion Creek Greenbelt	Continuing bird reported by Nick Komar and Justin Bosler. Just off walking path in thick brush, about 1km SW of north trailhead. (30.1668120, -97.7484117)	30.1706	-97.742
04/02/2021	1	Janet Davis	TX, Onion Creek Metropolitan Park	Continuing bird first found by Nick Komar and Kiwi. Heard and then seen in thick cover a few feet from coordinates that Justin Bosler listed from the other day: 30.1671016, -97.7482072. First heard call, walked over to investigate, and then bird sang while perching mid-canopy in a cedar elm for a few seconds: loud, clear, distinctive burbling song. Bird flew in direction of trail and then perched again in a thicket out of view. We walked over to relocate and met up with Caleb Helsel, who also had heard the bird singing. Bird sang briefly a second time and then disappeared. Large dark rufous brown thrasher with long, slightly curved black bill, gray face, long tail, thin wing bars, and bold black stripes on breast and belly. We spent the ne	30.1618	-97.756
04/06/2021	1	Jeffrey Jackson	TX, Onion Creek Metropolitan Park	Continuing bird first heard singing, was able to locate at top of small Cedar Elm. Gray-brown Thrasher with dark streaking on breast. 30.1673352, -97.7481277 audio recording tba	30.1618	-97.756
05/02/2021	1	Brush Freeman	TX, Uteley cabin	Photos taken by remote critter cam from May 2 to 5. Not personally seen but same cam also took photos of Brown Thrasher previously in spring for good comparison. Will post photos when I am able.	30.2168	-97.425
Sage Thrasher 03/04/2021	1	Bruce Neville	TX, Madison Co.-- Bundic Road/CR431	Owling at a flock of white-throated sparrows, hoping, in vain, to pull out a Harris's sparrow, or better. Noticed a medium-sized passerine perched at the end of a branch about 4 feet above the ground above a gate in the hedgerow. Breast off-white with dense, thin, dark gray streaking (not black and droplike); bill longer than robin's and dark, very weakly curved, shorter and less curved than Toxostoma thrashers; tail relatively short, weakly rounded, not mobile. Bird was perched facing me. When I realized it was not a brown thrasher, and approached, it dropped into the tangles of the hedgerow. The details of the upperparts were not seen, but they were definitely gray, not rufous. According to Birds of North America, the first eggs of	30.9246	-96.133
Scaly-breasted Munia 03/15/2021	1	Mark McDermott	TX, College Station: Brazos Co.	Initially identified and reported by Kevin Skow. Origin unknown! Have photos and sound recording. Only saw one bird. Heard a possible second bird. Kevin has photographed two birds together. At feeder of private residence.	30.4977	-96.276
03/27/2021	2	Bill Eisele	TX, Brazos County	Continuing birds for about 2 weeks. Appeared at 6:30 pm and fed on the ground. Also heard their high-pitched "chee" calls. Visible for about 5 minutes. See photos.	30.5040	-96.295
Purple Finch 03/06/2021	48	Bill Eisele	TX, College Station-- Woodcreek	Continuing, large flock. One group of 23 and then they flew off in one direction, and then later another large group of 25+. PUFIs coming in and out in small groups all day. Probably many more.	30.5914	-96.275
03/11/2021	43	Bill Eisele	TX, College Station-- Woodcreek	Continuing, large flock. Probably many more because I was in the house, and I could not see the top of the trees. At 10 am I had a high count of 36 PUFIs together at the feeders. I had 11 male PUFIs today, which I think is a high for the backyard.	30.5914	-96.275
03/12/2021	31	Bill Eisele	TX, College Station-- Woodcreek	Continuing, large flock.	30.5914	-96.275
03/25/2021	3	Nathan Cowan	TX, Waco: McLennan Co.	Continuing birds that have made sporadic appearances. 1 male and 2 female/immature.	31.5506	-97.201
Pine Siskin 03/01/2021	130	Bill Eisele	TX, College Station-- Woodcreek	Continuing, large flock. 10x10 estimate. Likely conservative count.	30.5914	-96.275
03/01/2021	1	Dan Allen	TX, Allen Ranch: Bastrop Co.	limited streaking on sides and breast. Wide wing bars, yellow on upper back of tail.	30.1206	-97.157
03/01/2021	325	Simon Kiacz	TX, Bryan: Brazos Co.	Estimate; hordes on feeders all day	30.6727	-96.322

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
03/02/2021	150	Bill Eisele	TX, College Station--Woodcreek	Continuing, large flock. 10x10 estimate.	30.5914	-96.275
03/03/2021	150	Bill Eisele	TX, College Station--Woodcreek	Continuing, large flock. 10x10 estimate. Very flighty and probably many more than this. When I stepped outside, the birds were even more buzzy and excited, and several were even signing.	30.5914	-96.275
03/03/2021	113	Brandy Falise	TX, Brazos County	Actual count but may be missing some due to line of sight and how spread out they were. Even on the roof of our sunroom.	30.5632	-96.287
03/05/2021	160	Bill Eisele	TX, College Station--Woodcreek	Continuing, large flock. Probably an underestimate.	30.5914	-96.275
03/06/2021	200	Bill Eisele	TX, College Station--Woodcreek	Continuing, large flock. Estimate, likely conservative. On 2 occasions, most of the winter flock flew off, and there were probably 300+ birds total.	30.5914	-96.275
03/07/2021	56	Nathan Cowan	TX, Waco: McLennan Co.	Numbers have been gradually increasing over past couple of weeks.	31.5506	-97.201
03/08/2021	120	Bill Eisele	TX, College Station--Woodcreek	Continuing, large flock. 10x10 estimate.	30.5914	-96.275
03/09/2021	150	Bill Eisele	TX, College Station--Woodcreek	Continuing, large flock. 10x10 estimate, and probably more.	30.5914	-96.275
03/10/2021	230	Bill Eisele	TX, College Station--Woodcreek	Continuing, large flock. 10x10 estimate, likely conservative because I could not see up into the trees.	30.5914	-96.275
03/10/2021	2	Bill Eisele	TX, College Station--Woodcreek	Continuing green morphs. At least 2 present in the huge PISI flock, and I have had multiple in the past. Yellow cast above, less distinct striping on sides/breast and plainer face. Overall more strong yellow color.	30.5914	-96.275
03/11/2021	200	Bill Eisele	TX, College Station--Woodcreek	Continuing, large flock. 10x10 estimate. Probably even more up in the trees that I could not see.	30.5914	-96.275
03/11/2021	2	Bill Eisele	TX, College Station--Woodcreek	2 birds continuing. Today I saw them fighting a bit for the thistle feeder sock. These green morph birds appear slightly larger, and they do seem to dominate the thistle feeder. These 2 birds have an overall yellow cast much more substantial than the other PISI, less distinct patterning on the face and lighter striping. Very active birds, so unfortunately I could not get a photo when they were both together. I did get some photos of 1 of the birds (the bird that seemed to have more yellow coloring).	30.5914	-96.275
03/12/2021	180	Bill Eisele	TX, College Station--Woodcreek	Continuing, very large flock.	30.5914	-96.275
03/13/2021	80	Bill Eisele	TX, College Station--Woodcreek	Continuing, large flock. Smaller flock today, probably because I was outside.	30.5914	-96.275
03/18/2021	61	beau schaefer	TX, Bosque River-Middle: McLennan Co.	Probably an undercount. Had 3 large groups.	31.5615	-97.573
03/22/2021	81	beau schaefer	TX, Bosque River-Middle: McLennan Co.	Likely an undercount; had 5 large groups one of which had 38 birds. They were everywhere there were trees especially along the river	31.5615	-97.573
03/23/2021	57	Nathan Cowan	TX, Waco: McLennan Co.	An increased number over previous days. Covering feeders and water features.	31.5506	-97.201
03/29/2021	51	beau schaefer	TX, Waco: McLennan Co.	Two groups seen and heard well. 37 in courtyard at lovers leap and 14 along river trail	31.5862	-97.165
04/18/2021	58	beau schaefer	TX, Lake Waco Wetlands (PPW-W 028)	3 large groups	31.6074	-97.304
04/19/2021	3	DEBBIE MC	TX, Austin Co.--Wallis area	Continuing birds	29.6476	-96.140
04/30/2021	3	Donna Lewis	TX, Gause area: Milam Co.	A few of them are still here... They haven't all left yet..	30.7312	-96.722
05/01/2021	16	Marilyn Tears	TX, Camp Creek Lake (restricted access)	Small finches, heavily dark-streaked, with narrow spiked bills. Variable yellow streaking in wings and tail. Sixteen Siskins were carefully counted, present at once. Four siskins were present at the feeders for most of this viewing session, and suddenly this larger flock joined them. One bird seemed larger, yellower; we finally decided it too was a Siskin. Photos tba.	31.0580	-96.304
05/01/2021	2	Donna Lewis	TX, Gause area: Milam Co.	Most are gone, but 2 were in my feeder again this morning..	30.7312	-96.722
05/04/2021	60	Justin Bosler	TX, Jaycee (Northside) Park, La Grange	multiple flocks, very conservative count	29.9083	-96.891

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
05/10/2021	1	Donald Brightsmith	TX, College Station: Brazos Co.	Still have one left from invasion thus winter. Only one seen all day. Still coming to thistle feeder. Smaller than female house finch, heavily striped pointier bill, yellow in tail.	30.6594	-96.271
05/12/2021	1	Donald Brightsmith	TX, College Station: Brazos Co.	Coming to feeder. Bright yellow in wings and tail. Heavily striped, pointed bill, smaller than house finch.	30.6594	-96.271
05/20/2021	1	Justin Bosler	TX, The Preserve at Travis Creek	h.o. - classic rising call note, high flyover	30.2479	-97.844
05/23/2021	1	Shirley Wilkerson	TX, Brazos County	came to feeder in the rain	30.7751	-96.300
05/24/2021	1	Shirley Wilkerson	TX, Brazos County	came to feeder today {and yesterday in the rain}	30.7751	-96.300
Chestnut-collared Longspur					3	
03/20/2021	5	Suzanne Kho	TX, Lake Travis--Bob Wentz Windy Point Pk	Continuing birds discovered by Vincent Oâ€™Brien this morning. Remarkably well-camouflaged in scrubby vegetation along waterâ€™s edge. First observed a drab female type and then a flock of five with two more colorful males with rufous napes and black bellies. Thanks to Jane and Vincent for excellent directions. (Digiscoped photo attached.)	30.4128	-97.900
03/21/2021	4	JL& YP	TX, Lake Travis--Bob Wentz Windy Point Pk	continuing. at least 2 males and 2 females.	30.4128	-97.900
04/15/2021	3	Janet Davis	TX, Lake Travis--Bob Wentz Windy Point Pk	A surprise: foraging amid rocks and foliage near boat ramp. Photo to follow.	30.4128	-97.900
Cassin's Sparrow					3	
05/02/2021	1	Shelia Hargis	TX, Bastrop Co.--Sayers Rd. (CR157)	With Grasshopper Sparrow on road, obvious eye-ring, dingy faint streaks across upper breast and flanks, grayish wash across upper breast. In same general area as last yearâ€™s singing bird, just a little further north near cattle gate.	30.2019	-97.360
05/02/2021	2	Brush Freeman	TX, Williamson County (west)	1 HO one seen briefly way out from road.	30.7450	-97.936
05/05/2021	1	Sean Mecredy	TX, Milam Co.--CR402 Donahoe Creek bridge area	singing in flight display	30.8141	-97.276
Grasshopper Sparrow					2	
05/01/2021	15	Alberto Manterola	TX, Anderson-Tucker Ranch--Black Bridge (private)	Exact count as we drove across the grass over the 3.28 miles flushing them out. Included singing males but likely also females at least in territory if not already on nests	30.9793	-96.744
05/02/2021	36	Rich Kostecke	TX, Granger area: Williamson Co.	Large movement after weekend storms	30.7142	-97.403
Lark Sparrow					1	
05/01/2021	40	Keith Andringa	TX, Moore Farms: Brazos Co.	*high-Estimate. Everyone in ag fields and fence lines	30.4182	-96.250
Lark Bunting					27	
03/02/2021	1	Ronald Newhouse	TX, Pitts Road Pond: Brazos County	Large bluish bill, broad white edges on greater coverts, (agrees with Sibley Guide). This does not appear to be the same one that Bill E. photographed a couple of days ago.	30.6327	-96.492
03/02/2021	5	Ken Wilson	TX, Mexia area: Limestone Co.	White eyebrow, white moustache stripe. Blackish wings.	31.6247	-96.426
03/03/2021	3	Vaishali Katju	TX, Pitts Road Pond: Brazos County	Continuing. But observed three individuals simultaneously. Photo provided with two of them in the same frame.	30.6396	-96.498
03/04/2021	123	Jeremy Ballard	TX, Valley Mills area: McLennan Co.	I saw a single bird here earlier this year. I decided to return for my monthly goal count. To my surprise there was well over 100 birds. Initially they were in the brush and on fence wiring along the side. Then they flew into the field and perched on a cactus and tree. They definitely were transitioning into breeding colors. Large beaks, bold lateral throat stipe, broad white edges on greater covers, dark legs, white tips on underside of tail, white coverts visible in flight. Pics to come.	31.6295	-97.417
03/04/2021	2	Caleb Evans	TX, Brazos Co.--Pitts & Kuder Roads	Continuing observation where seen by others. Both perched on fence near this spot.	30.6327	-96.491
03/06/2021	32	Anand Chaudhary	TX, Valley Mills area: McLennan Co.	Continuing. Reported by J Ballard. Counted 32 on a small tree. There were more on the grass, hard to see. Too close to a private residence so did not feel comfortable to get out of the car for a closer look. Picture.	31.6057	-97.392

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
03/06/2021	66	Matthew York	TX, Valley Mills area: McLennan Co.	J. Ballard reported a flock >100 at this location. I saw them in a thicket of greenbriar and honey locust saplings along the fenceline, across the road from a cattle trough at the bend in the road. Likely more than what I was able to see. *Photos* ..... so, bold black lateral stripe on throat, pale blue-gray mandibles, broad white edges to greater coverts, streaking below with some birds showing a bit more splotching of black. 31.60513 -97.39272	31.5926	-97.385
03/07/2021	9	Jason Leifester	TX, Shipp / Stagners Lake	Flock along fence around small patches of prickly pear and mesquite along Loop Road (30.012375, -97.140497).	29.9886	-97.120
03/07/2021	1	Erin Flynn	TX, Bastrop County	Non-breeding male or adult female. Black moustache, brownish cheek patch, bright white under cheek, white edges on greater coverts. Dark streaks on sides and belly. Large bluish bill.	30.1761	-97.423
03/08/2021	8	Phil Rostron	TX, Shipp / Stagners Lake	[Phil Rostron] Also 8 Lark Buntings in the big patch of prickly pear right where Loop Rd crosses over Hwy 71 into Smithville. Same spot as previously reported and a location where I have seen them in previous winters.	29.9886	-97.120
03/08/2021	7	Chris Holmes	TX, Valley Mills area: McLennan Co.	Continuing. Nonbreeding plumage. Large-headed, blue bills.	31.6052	-97.392
03/09/2021	80	Tim Farek	TX, Valley Mills area: McLennan Co.	Continuing birds. Thick bills, streaky brown with white wing bars. Females and non-breeding male plumage. Males transitioning into breeding plumage. Saw a sentinel bird perched on fence at curve in road. A large flock exploded like a covey of quail from the tall grass as I approached. Constantly going from ground to trees to cactus and back to fence line. Flock sometimes mixed with Brown-headed Cowbirds. See pictures.	31.6061	-97.392
03/12/2021	7	Mike Goebel	TX, Shipp / Stagners Lake	Apparently living in/near the large clump of prickly pear cactus just before Loop Road crosses over Hwy 71. Streaky sparrow-like birds, short tail with white tips. Large typical bunting bill, bluish-gray, darker on top. On females wing coverts show strong white edging, on males covert patch appears mostly white. Narrow white eye-ring and hooked white malar area somewhat like a Vesper Sparrow. Dark black throat stripe. Males range from slight black smudging on face, to extensive black on face belly and wings.	29.9886	-97.120
03/12/2021	126	Tim Farek	TX, Valley Mills area: McLennan Co.	Continuing birds. Large grey beaks. White wing bars. Males transitioning into breeding plumage. A few individuals on fence lines along road. Flock was at the bend of the road. Photos to follow.	31.6228	-97.413
03/13/2021	7	Shelia Hargis	TX, Shipp / Stagners Lake	Previously reported. Still in same area near loop road and Hwy 71, near cactus.	29.9879	-97.119
03/13/2021	33	Matthew York	TX, Valley Mills area: McLennan Co.	continuing location of large flock. I only had two small groups. Likely more in the grasses and at distance down the hillslope.	31.5926	-97.385
03/13/2021	5	Ian Layton	TX, Smithville: Bastrop Co.	In cactus patch where Loop road meets SH71. Pictures	30.0115	-97.142
03/13/2021	27	Amberly Neice	TX, Valley Mills area: McLennan Co.	Likely underestimate. Continuing birds some even in transitional plumage. Large streaky sparrows with blueish bill and obvious white wing patches.	31.6303	-97.418
03/13/2021	4	Bernd Gravenstein	TX, Shipp / Stagners Lake	In field with prickly pear where Loop Road crosses Hwy 71 where previously reported. Chunky, big-billed sparrow like with white tips on short tail. Females showed streaky breast, black lateral throat stripe white edges on wings. Male showed bold dark face pattern, white wing patch.	30.0049	-97.095
03/13/2021	30	Matthew York	TX, McLennan County	estimate of flyover flock. Streaked below, conspicuous broad white edge to greater covers, males showing a bit more black in places. Dark later throat stipe, large-ish gray blue bill. 31.62517 -97.40150	31.6249	-97.402
03/13/2021	4	Shelia Hargis	TX, Shipp / Stagners Lake	Previously reported. In the same area as earlier this morning, near northwest end of loop road and Hwy 71.	29.9879	-97.119
03/15/2021	43	Tim Farek	TX, Crawford area: McLennan Co.	Gray bills. Streaky brown with white wing bars. Males transitioning into breeding plumage. Different flock than the Wolf Lane flock. Foraging in tall grass on ground. Hard to see until they perch on cactus.	31.5713	-97.414
03/16/2021	1	Caleb Helsel	TX, Milton Reimers Ranch Park	Still around. I saw a sparrow fly over the turkey loop trail with obvious white wing patches. Eventually tracked it down and got some classic "perched on cactus" shots	30.3642	-98.123

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
03/19/2021	1	Walter Rudzinski	TX, Milton Reimers Ranch Park	Near multi use and turkey loop intersection. Dark face white wing patch large bill sitting on a cactus	30.3642	-98.123
03/20/2021	1	Michael McCloy	TX, Brazos Co.--Pitts & Kuder Roads	Along Pitts Rd, female, across from driveway immediately before pond. Chunky sparrow, with hefty bill, streaked underside, and dark malar stripe. Prominent white on wing. Numerous photos, photos tba. Came in immediately to playback and perched atop tree alongside several WCSP. Also tried for this species along Kuder Rd at the spot where they have frequently been seen lately, but no luck	30.6327	-96.491
03/21/2021	37	beau schaefer	TX, McLennan County	Whitish bill, dark face around bill streaked breast non-breeding males some becoming more black; photos	31.5488	-97.433
03/28/2021	7	Adam McInroy	TX, Travis Co.--Wells Lane	Continuing at skog, between the goats and the creek. Photos.	30.3985	-97.449
Brewer's Sparrow						1
05/03/2021	1	Caleb Helsel	TX, Barton Creek Wilderness Park	Seen in the field at the base of the hill of life in low shrubs (30.270333, -97.830075). Before leaving, I decided to walk the trail that runs through the middle of the field which had abundant clay-colored sparrows today. I saw a very plain spizella fly up from a small shrub and fly into a different one with some CCSP. Similar size and shape to nearby clay-colored, but with much more gray coloration, and fine dark streaks on the crown and nape.	30.2691	-97.824
Baird's Sparrow						1
05/02/2021	1	Bill Reiner Jr.	TX, Pace Bend Park	Assumed to be Grasshopper Sparrow from overall pale yellowish color when it flushed with four Clay-colored Sparrows, but strong malar and moustachial streaks eliminated GRSP. Fine streaks across breast but not far down flanks. Flat head makes bill look large (as in GRSP). In patch of grass and Mexican-Hat at 3-way intersection of mowed roads on north side of northeast-most peninsula of day-use area. N30.45963° W98.00381° A few SAVS and GRSP also in the area.	30.4418	-98.035
Song Sparrow						1
03/09/2021	30	Woody Raine	TX, Shipp / Stagners Lake	Several groups	30.0126	-97.141
Green-tailed Towhee						2
03/07/2021	1	Jason Leifester	TX, Shipp / Stagners Lake	Presumably the same individual reported twice last October and November, as this one was in the exact same spot (29.998106, -97.093076). Moved back and forth across road, often in thick tangles of vines. Associating with White-crowned Sparrows. Also a Spotted Towhee and an Eastern Towhee at the same location.	29.9886	-97.120
03/08/2021	1	Bernd Gravenstein	TX, Shipp / Stagners Lake	[Bernd Gravenstein, Philip Rostron] Continuing bird, at previously reported location. Phil, "Finally caught up with the Green-tailed Towhee which has apparently wintered on Loop Rd in Smithville although it had not been reported on ebird since November until yesterday. Exact same spot as before (29.998106, -97.093076). Initially it was skulking in the thicket on the north side of the road but eventually came out to feed on the south side."	30.0049	-97.095
Bobolink						9
05/03/2021	20	Gil Eckrich	TX, Belton	[ph. Steve Snyder, Gil Eckrich] Crazy number but a flock migrating through. Pam Cummings alerted me to their presence. We both seemed to have focusing issues and sun was extremely bright but did get some usable pics. Gil Eckrich joined me but by then the large flock had moved north or spread out, Gil did get to see some. Every time a car would go by they would disperse into the fields but then come back to the fence along the road. Will add a few decent pics.	30.9595	-97.412
05/04/2021	14	Daniel Kelch	TX, Bell County (east)	[ph. Gil Eckrich, ph. Daniel Kelch]	30.9569	-97.413
05/04/2021	5	Randy Pinkston	TX, Bell County (east)	males. photos forthcoming.	30.9718	-97.407

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
05/04/2021	15	Charlie Plimpton	TX, Bell County (east)	As I arrived at the location where these birds were previously reported, I noticed the flock perched together on the fence line. Before I could get an exact count, another car passed by, and the group flew out into the field. It looked like there were roughly 15-20 birds. A few birds returned to the fence further down the road where I was able to obtain pictures. Birds were actively singing from the fence and the field where the rest of the group dropped down. I returned later on around 4:30 and could not relocate them.	30.9616	-97.411
05/06/2021	2	Charlie Plimpton	TX, Bell County (west)	Identified first by song that was heard during a point count outside of the 100 meter circle I was monitoring. After the count I walked in the direction the song was coming from and found two male birds atop a flame leaf sumac. Lots of Dickcissels present nearby as well. I post a few pics later.	31.1689	-97.696
05/11/2021	12	Greg Pasquariello	TX, Bell County (east)	A small flock of male and female BOBOLINKS feeding and flying about the field and fences almost exactly at the list coordinates. Noticed them as a bunch of dark birds with white rumps flushed as I was watching dickcissels. Very cooperative, likely will be present in the morning. 30.822254992757063, -97.51338218719407	30.8323	-97.512
05/13/2021	18	J Berner	TX, Katy Prairie-- Penick Rd. b/w Hebert & Berry	Heard and seen well	29.9271	-95.924
05/13/2021	2	David Bradford	TX, Katy Prairie Conserv.-- Indiangrass Preserve	2 males: mostly black body with white on wing and rump visible in flight, and large golden buff patch on back of head and nape!seen when landed on wildflowers.	29.9288	-95.925
05/13/2021	4	Greg Pasquariello	TX, Bell County (east)	Dry field, carryover from a couple of days earlier	30.8323	-97.512
Hooded Oriole						1
05/24/2021	1	Andrew Dickinson	TX, Meadow Lake	!!! Breeding male. Brilliant flame orange breast, crown and nape with black throat extending over eye. Large, prominent white wing bars. Lacked black crown/nape/eyeline pattern of Bullock's. Smaller and more slender than Baltimore/Bullock's. Close in size to Orchard but completely different plumage. Feeding in mulberry, then gave chattering call in flight. Unmistakable.	30.5490	-97.663
Bullock's Oriole						6
05/07/2021	1	Fay Ratta	TX, McLennan County	Bright orange-yellow oriole with black throat and eyeline. Black crest just coming in.	31.6764	-97.292
05/13/2021	1	Anand Chaudhary	TX, Baylor University--Moody Library/Martin Museum/McLane Ctr. area	Bullock's x Baltimore Oriole (hybrid). Had identified as BAOR, now corrected. A hybrid Bullock's x Baltimore Oriole was at the Baylor University campus, McLennan Co. 13 May+ (Anand Chaudhary).	31.5486	-97.114
05/16/2021	1	Anand Chaudhary	TX, Baylor University--Moody Library/Martin Museum/McLane Ctr. area	Bullock's x Baltimore Oriole (hybrid), Had identified as BAOR, now corrected.	31.5486	-97.114
05/25/2021	1	Andrew Dickinson	TX, Meadow Lake	I am 93.47% sure this is not the same bird I ID'd as Hooded Oriole yesterday. Much more extensive white in wing, deeper orange color, black crown and eyeline. Giving short whistled song from top of large bare sycamore.	30.5490	-97.663
05/27/2021	1	Anand Chaudhary	TX, Baylor University--Moody Library/Martin Museum/McLane Ctr. area	Bullock's x Baltimore Oriole (hybrid), Had identified as BAOR, now corrected.	31.5486	-97.114
05/28/2021	1	Anand Chaudhary	TX, Baylor University--Moody Library/Martin Museum/McLane Ctr. area	I thought it was another Baltimore, didn't even think of Bullocks at that time. Did see a yellowish head unlike the hybrid I usually see and hear (and was hearing from nearby at the same time). After R King took pictures, I am confident I had seen the Bullocks.	31.5486	-97.114
Baltimore Oriole						3
03/30/2021	1	Ronald Newhouse	TX, Brison Park	Calling as it moved through the tree tops. Yellow underside (with a hint of orange). Female or juvenile male.	30.6077	-96.334
05/21/2021	2	Juan Anaya	TX, McGregor area: McLennan Co.	Male and female feeding on oranges every morning and yucca plants	31.4413	-97.425

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
05/27/2021	2	Juan Anaya	TX, McGregor area: McLennan Co.	Have seen them stop for water during migration every year for a day or two. This year a pair decided to stay. Going through a lot of oranges. The female loves the trumpet vine. The male favors the yucca plants and rarely comes out in the open.	31.4414	-97.424
Scott's Oriole						
03/03/2021	1	Sid Ehlert	TX, Anderson area: Grimes Co.	[Facebook RBAS, Sid Ehlert] "Big thanks to Pix Hitchcock and her awesome hospitality! I was able to get several shots of the Scott's Oriole which has been visiting her feeders the past few days. Such an amazing bird for the area."	30.5491	-96.014
03/04/2021	1	April Serig	TX, Anderson area: Grimes Co.	[Facebook RBAS, April Serig] "Thanks to Pix Hitchcock for letting Jackie and I come by to get the Scott's Oriole. And for me bonus Pine Siskins. I know, it has taking me this long to add the siskins to my life list ?? I may have had them pointed out to me before, but this is the best look I've had. Also got my best look at a Pileated Woodpecker too."	30.5491	-96.014
03/05/2021	1	April Serig	TX, Anderson area: Grimes Co.	[Facebook RBAS, April Serig] "Thanks to Pix Hitchcock for letting Jackie and I come by to get the Scott's Oriole. And for me bonus Pine Siskins. I know, it has taking me this long to add the siskins to my life list ?? I may have had them pointed out to me before, but this is the best look I've had. Also got my best look at a Pileated Woodpecker too." "Oriole with yellow belly, dark head, and breast, white edges on wings, mottled back"	30.5491	-96.014
03/18/2021	1	Gil Eckrich	TX, Bell County (east)	[ph. Gil Eckrich] Well photographed	31.2012	-97.493
Common Grackle						
03/06/2021	650	Simon Burton	TX, Texas A&M Univ.--Ecology & Natural Resource area	Roost movement, presumably. Estimated count, counted in blocks of fifty. Hard to count as they moved over me not far above the tree canopy, in a single broad wave.	30.5734	-96.365
03/18/2021	1,650	Cameron Johnson	TX, Brison Park	Conservative estimate. Many large flocks of Common Grackles flew over in waves over the course of 15 minutes.	30.6077	-96.334
Blue-winged Warbler						
05/19/2021	1	Callen Inman	TX, Brackenridge Field Labs (U.Tx.)	heard characteristic two note song "æbee buuuuuzzâ€? in brambles, then got great looks at a yellow bird with narrow black line through the eyes and two white wing bars. Already recorded this species here about a month ago. On east side of property just south of experimental plots in brambles	30.2821	-97.779
Prothonotary Warbler						
04/03/2021	2	beau schaefer	TX, Richland Creek WMA (N. Unit)(Freestone Co.)	Birds singing in flooded woods on the east side right next to the trail. Heard 2 birds calling back and forth.	31.9833	-96.081
04/03/2021	2	Greg Cook	TX, Richland Creek WMA (N. Unit)(Freestone Co.)	Loud, distinctive, 3 note song.	31.9833	-96.081
04/12/2021	4	Rich Kostecke	TX, Granger Lake--San Gabriel Unit	Counted singing territorial individuals in fairly extensive willow woodland	30.6674	-97.402
04/13/2021	1	beau schaefer	TX, Lake Waco Wetlands (PPW-W 028)	Not sure why this is rare since the swampy river habitat is perfect for them on the east side. Great looks at a singing bird. Bright yellow with bluish wings, jet black eye and bill, white undertail. Sweet, sweet, sweet call at beginning and end of sound clip.	31.6074	-97.304
04/14/2021	1	Anand Chaudhary	TX, Lake Waco Wetlands (PPW-W 028)	Seen briefly (approx 3 seconds). Bright yellow bird, darkish tail moving from stump to stump along water. Heard familiar call for > 10 minutes.First attempt at uploading a bird song.	31.6074	-97.304
04/18/2021	1	Chris Koch	TX, Lake Waco Wetlands (PPW-W 028)	Follow up on previously reported on the far east side of the area. Down thr mowed road/path next to the river. Bright yellow and singing distinctly while perched on dead tree branch. Picture to come	31.6074	-97.304
04/24/2021	2	Cheryl Wolfe	TX, Lake Waco Wetlands (PPW-W 028)	Heard but not seen.	31.6074	-97.304
04/26/2021	3	beau schaefer	TX, Lake Waco Wetlands (PPW-W 028)	At least 3; singing along river at 3 distinct and separate locations; may have been more.	31.6074	-97.304

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
05/02/2021	2	Fay Ratta	TX, Lake Waco Wetlands (PPW-W 028)	Heard right after Jeremy and Nate got the photo. 2 clearly calling their 7-note "sweetsweet"?	31.6074	-97.304
05/07/2021	1	Cheryl Wolfe	TX, Lake Waco Wetlands (PPW-W 028)	In swampy back edge of Waco Wetlands. Singing loudly.	31.6074	-97.304
05/28/2021	1	Kay Zagst	TX, Lake Waco Wetlands (PPW-W 028)	Known location. Heard only with the distinctive sweet, sweet, sweet.sweet.sweet song. Too distant to get a good audio recording worth uploading.	31.6074	-97.304
05/29/2021	1	C. Jackson	TX, Lake Waco Wetlands (PPW-W 028)	Singing next to river southeast of same place as last year (or was that year before?) at 0915. This was just as the sun began to pierce the fog. I did not get a visual but I'm gonna go ahead and report it. Song was clear, but it stayed well out of sight and no closer than 75-100 feet to the southeast, on the river edge. I waited to no avail. Need a boat to get within view. Song was clear and repeated maybe a dozen times. Only afterward did I remember my phone to record. I was focused on its possibly coming in view, scanning, standing ready to take a photo.	31.6074	-97.304
Orange-crowned Warbler						
03/12/2021	13	Simon Kiacz	TX, Lick Creek Park (PPW-W 008)	*high. Estimate	30.5622	-96.213
Nashville Warbler						
04/15/2021	16	Callen Inman	TX, Brackenridge Field Labs (U.Tx.)	Lots of singing males, some song variations easily confused for other warblers but I double checked visual ID in each case	30.2821	-97.779
04/25/2021	25	Callen Inman	TX, Onion Creek Metropolitan Park	Singing everywhere, with some notable song variations. Some songs similar to Tennessee and Black-and-white but verified as Nashville	30.1618	-97.756
04/25/2021	26	Brooke Smith	TX, McKinney Roughs Park (HOTE 034)	Over the course of the hike Nashville's were heard signing every step of the way.	30.1366	-97.459
04/30/2021	20	Paul DiFiore	TX, Boggy Creek Greenbelt, Austin	Just everywhere	30.2676	-97.714
MacGillivray's Warbler						
05/03/2021	1	Lance Felber	TX, Mills Pond at Wells Branch	Found earlier by Jane Tillman and refound by Byron Stone. Grey hood with eye arcs. Poor photo tba	30.4500	-97.680
Common Yellowthroat						
05/13/2021	20	Joseph Mitchell	TX, Oak Springs, Austin	5 different males and tons of immature/female.-I've never seen so many anywhere. Likely an undercount.	30.2715	-97.702
American Redstart						
03/26/2021	1	Carlos Ross	TX, MetCenter Disc Golf Course, Austin	FOY, early. Male in large oak tree by CAPCOG side entrance with YRWA (myrtle) and RCKI.	30.2038	-97.705
05/14/2021	16	Vaishali Katju	TX, College Station: Brazos Co.	Extremely high density of birds. Tally. Happy to provide photos.	30.6103	-96.284
Cerulean Warbler						
05/06/2021	1	Laura Sare	TX, Brazos County	Male, blue above with white chin, blue streaks on flanks and white wingbars, was singing the three part buzzy song photographed	30.5921	-96.404
05/13/2021	1	Daniel Kelch	TX, Temple Lions Park		31.0617	-97.405
Magnolia Warbler						
05/11/2021	20	Jason Leifester	TX, Elgin area: Bastrop Co.	Most at Morris Memorial Park, but also in my yard. Often several interacting aggressively.	30.3493	-97.371
Bay-breasted Warbler						
05/07/2021	2	Randy Pinkston	TX, Temple Lions Park	adult female found first, foraging directly overhead in mid-canopy--great views. not much later a stunning adult male appeared less than 30 feet away. he was very cooperative while actively foraging directly overhead.	31.0617	-97.405
05/11/2021	8	Vaishali Katju	TX, College Station: Brazos Co.	Individually counted along transect. Have photos.	30.6103	-96.284
05/19/2021	1	Suzanne Kho	TX, Nicholas Dawson Park	Beautiful male with reddish brown head, throat and flanks.	30.2524	-97.754

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
Blackburnian Warbler						1
05/19/2021	5	Dianne Robinson	TX, Texas A&M Univ.--Ecology & Natural Resource area	2 male and 1 female in one spot, 1 male and 1 female in another area in separate warbler flock	30.5734	-96.365
Yellow-rumped Warbler						1
03/28/2021	1		TX, College Station--Southwood Valley	[FaceBook RBAS] Sandra Elkins, Southwood Valley, Audubon's yellow rump warbler still hanging around for the bark butter. Really I don't know if it's the same one but it's so rare I'm assuming it is. He is just so much darker and brighter now.	30.5847	-96.304
Black-throated Gray Warbler						1
04/30/2021	1	Ron and Susan Marti	TX, Smithville: Bastrop Co.	[Ron and Susan Martin] Seen well over 25 minutes. Head pattern seen well and unlike bwwa . Short bill unlike bwwa. Throat pattern and chest stripes match that of female btgr.	30.0085	-97.145
Black-throated Green Warbler						4
03/11/2021	1	Janet Davis	TX, Austin (Travis Co.)	Nice surprise. Early migrant. Black throat and streaks on sides; white wing bars. Yellow cheeks and green back. Photo to follow.	30.3437	-97.742
03/24/2021	10	Rhett Raibley	TX, Lemontree Park	Conservative estimate without double counting, large mixed flock	30.6047	-96.316
04/29/2021	11	Christopher Rustay	TX, Brothers Pond Park	as exact a count as possible. these guys were everywhere. probably an undercount	30.5839	-96.300
05/25/2021	1	Suzanne Kho	TX, West Bouldin Creek Greenbelt	Getting a little late; female; seen and heard chipping.	30.2540	-97.760
Scarlet Tanager						3
04/09/2021	1	Meredith Anderson	TX, Brison Park	Bright red bird with black wings. Sitting still, quietly on open branch. Picture available, will upload.	30.6077	-96.334
04/10/2021	1	Bill Eisele	TX, Brison Park	8:18 am. Male. Presumably the continuing bird found by Meredith yesterday. Red bird with black wings and tail. East side of big sit clearing.	30.6077	-96.334
05/01/2021	2	Sharon Richardson	TX, Mills Pond at Wells Branch	Vibrant male and female seen.	30.4500	-97.680
Western Tanager						2
03/01/2021	1	Darrell Vollert	TX, Chappell Hill: Washington Co.	Continuing male visiting suet feeder. Had not seen this bird in a while.	30.1484	-96.257
03/03/2021	1	Darrell Vollert	TX, Chappell Hill: Washington Co.	Continuing male visiting suet feeder.	30.1484	-96.257
Black-headed Grosbeak						18
03/01/2021	2	Erik Sauder	TX, Austin (Travis Co.)	Continuing male and female, with great looks at male. Black face, black wings with multiple white patches. Orange-yellow underparts, nape and rump. At the level of feeders, but stayed in the surrounding trees.	30.2117	-97.779
03/01/2021	1	Justin Bosler	TX, Williamson Creek Central Greenbelt--Tom Donovan Nature Trail	continuing f-type, loosely assoc. w/ NOCA in greenbelt away from feeders	30.2124	-97.779
03/02/2021	1	Robin Dennis	TX, Austin (Travis Co.)	Female	30.2126	-97.779
03/09/2021	2	Cassie Tremant	TX, Austin (Travis Co.)	Continuing M and F pair	30.2118	-97.780
03/11/2021	1	Cassie Tremant	TX, Austin (Travis Co.)	Continuing. F	30.2118	-97.780
03/14/2021	1	Gus Cothran	TX, College Station--Woodcreek	Stocky bird, slightly larger than a Cardinal. Black head with white stripe at top of head, another above the eye and a third at jaw-line. Light orange breast with flanks slightly yellower and faint streaking on lower flanks (none in breast area). The species has been seen regularly in the area this location this year but not since late January.	30.5933	-96.274
03/15/2021	1	Caleb Helsel	TX, Roy G. Guerrero Colorado River Metro Park	Huge surprise! Seen on one of the back trails of circle acres (30.2389327, -97.7012018). The bird flew across the path in front of me and started preening. I think it was a first year male. Robin sized with large conical bill, orange breast, lemon yellow belly, and dark back with white wing bars. I saw the bird fly west towards the pyrrhuloxia area	30.2462	-97.705

Date	No.	Nam2	Location	Sighting Comments	Lat	Long
03/15/2021	1	Justin Bosler	TX, Williamson Creek Central Greenbelt--Tom Donovan Nature Trail	continuing f-type, foraging in lower canopy nr. trail just W of S. 1st St bridge	30.2124	-97.779
03/21/2021	1	Caleb Helsel	TX, Roy G. Guerrero Colorado River Metro Park	Continuing	30.2462	-97.705
03/21/2021	1	Steven McDonald	TX, Lake Creek Trail--West (Williamson Co.)		30.4674	-97.777
03/22/2021	1	Gus Cothran	TX, College Station--Woodcreek	[Gus Cothran] Continuing bird. NAB report, "A Black-headed Grosbeak that has been seen sporadically at feeders in Woodcreek subdivision, College Station, Brazos Co. since 1 Dec was again seen 14-22 Mar (Gus Cothran). Until this past winter, the species was rare in the county."	30.5933	-96.274
03/26/2021	1	Ann Bishop	TX, Austin (Travis Co.)	A single black-headed grosbeak on feeder. Then moved to nearby branch. Seen from inside house, 12 feet or so to feeder.	30.2501	-97.795
04/24/2021	1	Suzanne Kho	TX, Circle Acres, Austin	Perched high in tree; male with dark orange breast, black head and black wings with white patches.	30.2414	-97.697
04/30/2021	1	Adrian Johnson	TX, Austin (Travis Co.)	Adult male in breeding plumage. Black head with orange streak behind the eye was visible - round-ish head, thick silver beak, orange from the neck down with black wings with white streaks. Seen only briefly before flying away.	30.3127	-97.698
05/02/2021	1	Janet Davis	TX, Circle Acres, Austin	Possibly the same male that Suzanne saw last weekend. Perching in thick upper canopy atop hillside next to trailhead at Atwood Street. Orange breast, black wings with white wing patches, grosbeak bill and black head. Frontal view only before losing sight of the bird.	30.2414	-97.697
05/07/2021	1	Randy Pinkston	TX, Temple Lions Park	foraging on mulberries. photos forthcoming.	31.0617	-97.405
05/09/2021	1	Laurie Miraglia	TX, Mills Pond at Wells Branch	Observed female/immature-type grosbeak in top of tree. We were first struck by the dark bill which was bi-colored with upper mandible dark gray and lower mandible slightly lighter gray rather than pale bill of Rose-breasted Grosbeak. Chest had a buffy orange wash with finer streaking on sides and showed an un-streaked central breast and belly which is typical for BHGR. RBGR typically shows heavier streaking on breast/belly. Buffy orange wash extended around neck. Lemon-yellow could be seen under wing as bird moved around rather than warmer buffy color of underwings of RBGR. See photos.	30.4500	-97.680
05/13/2021	1	Ryan Pierce	TX, JJ Seabrook Greenbelt	Male. Uploading a couple blurry photos through my binoculars lense for documentation purposes as this bird gets flagged as unreported/rare.	30.2847	-97.700
Lazuli Bunting						9
04/20/2021	1	Donald Brightsmith	TX, College Station: Brazos Co.	[Donald Brightsmith at 9900 Hunters Hollow] Came to feeder. Male with clear blue in face, wide rusty breast band and white belly. Back had weak light brown wing bars and most of back was brown. Looks like a first year male?	30.6594	-96.271
04/25/2021	1	Simon Burton	TX, College Station--Foxfire: Brazos Co.	[Simon Burton] Briefly visited back yard, which is Post Oak and Elm sp. with significant understory of grasses and forbs. First seen moving from tree to tree at about head height, not using the canopy to forage, unlike the warblers, cardinals etc. Small, finch sized. Dropped to ground at base of Winged Elm and appeared to be feeding on Chickweed. Chunky bunting bill. Clear white double wingbars, intense blue face, chin and fore crown, warm brown mantle extending up onto nape. Some blue patches in the brown, so presumably first-alternate male. Orangey-brown chest and white belly.	30.5972	-96.278
04/30/2021	1	Brush Freeman	TX, Devine Lake Pk	One dull female...See photo	30.5833	-97.882
05/08/2021	1	Brazos Banditry	TX, Lake Somerville SP- Birch Creek Unit (PPW-W 005) (Burlison Co.)	Found on either the Bluestem bend trail or Beautyberry trail by Gregory Lewis	30.3011	-96.643
05/09/2021	2	Brian Sheehan	TX, Commons Ford Ranch Metro Park	Adult male and female in close proximity. SE corner of prairie, where trail to riverfront meets trail coming out of woods.	30.3374	-97.893

05/11/2021	1	Tyler Scott	TX, Texas A&M Univ.--Ecology & Natural Resource area	[ph. Dianne Robinson, Mark McDermott, ph. Tyler Scott, Keith Andringa, Meredith Anderson] Continuing bird found by Diane Robinson. Flew in to tall trees near pond. Male. Light blue bunting with rusty breast, white belly, and white wing bars. NAB report, "Lazuli Bunting - For a species not reported in Brazos Co. in a decade, reports of single Lazuli Buntings at three diverse College Station locations is surprising. The first was off Elmo Weedon Road in eastern College Station 20 Apr (Donald Brightsmith), the second was four miles away in Foxfire subdivision 25 Apr (Simon Burton), and the third was six miles away at the Ecology and Natural Resource Area 11-12 May (ph. Dianne Robinson, m.ob.). Another was observed 8 May (Gregory Lewis, m.ob.) at Lake Somerville Birch Creek Unit, a first for Burleson Co. Yet another was photographed 10 May (ph. Brian Burgoyne) at near Camp Swift in Bastrop Co. where it is only slightly more expected."	30.5734	-96.365
05/12/2021	1	Bill Eisele	TX, Texas A&M Univ.--Ecology & Natural Resource area	[Laura Sare, Bill Eisele] 8:00 am. Continuing bird, heard only, Responded to "tseep" call (series) on iBird Pro. Called "in stereo" with the playback series almost immediately from very close to where we were standing. Heard well by Laura and I. Laura and I both noted that the call series coming from the bushes was identical to the tape (same frequency and cadence). I immediately stopped the tape, and the bird continued briefly - identical to the tape. Call series was coming from a tangled brush 20 yards from where the bird was spotted late last night to the right of the path when looking at the pond. Could not locate the bird. Observers last night indicated that the bird was more responsive to call playback than songs, which was the case. No response from the son	30.5734	-96.365
05/17/2021	1	Chris Gunter	TX, Austin (Travis Co.)	Beautiful bright blue head, back and wings with white wing bars. Rufous or cinnamon breast and white underneath. Typical bunting bill. Very hard to confuse the male with anything else. By the time I grabbed my camera it was gone, but minutes later a female indigo bunting appeared.	30.2984	-97.800
Indigo Bunting						4
04/30/2021	11	John hale	TX, Moore Farms: Brazos Co.	Estimate of birds along 3 miles of river front. Many on territory plus multiple females.	30.4184	-96.247
04/30/2021	13	Darrell Vollert	TX, Brazos River Valley Trail (PPW-W 003)	Several feeding together in a field.	30.1722	-96.204
05/01/2021	14	Keith Andringa	TX, Moore Farms: Brazos Co.	*high-Minimum estimate. Didn't pay much attention but many singing along river	30.4182	-96.250
05/02/2021	14	Keith Andringa	TX, Sulphur Springs Road	Flock of 11, and three individual birds. Counted individually	30.5706	-96.167
